### PROFILE

Frontend Developer with 3 years of experience building pixel-perfect, high-performance web applications and translating complex designs into intuitive user interfaces. Proven track record progressing from hands-on implementation to acting lead developer, driving technical decisions and owning flagship products end-to-end. Skilled across the modern React/Next.js ecosystem, with a strong eye for detail, a collaborative approach to teamwork, and a continuous drive to learn and adopt new technologies.

### WORK EXPERIENCE

**Acting Lead Developer** — **Govtech Africa** *(November 2025 – November 2026)*
fulcrum.govtechafrica.com

- Took on technical decision-making responsibilities for the product as acting lead developer, setting frontend architecture, coding standards, and best practices for the team.
- Worked on the company's flagship products, including Fulcrum (https://fulcrum.govtechafrica.com) and the newly launched Atlas (https://atlas.govtechafrica.com), from core architecture through feature delivery and ongoing iteration.
- Collaborated with the Government Affairs and Public Policy (GAPP) team to architect and incorporate a dynamic blog system for publishing articles and industry updates.
- Designed and executed monthly email newsletter campaigns by engineering a Next.js API route integrating Zoho Campaigns for seamless web-option subscriptions.
- Configured Open Graph metadata, search engine optimization (SEO), and dynamic page titles across govtechafrica.com, atlas.govtechafrica.com, and fulcrum.govtechafrica.com to maximize platform visibility.
- Reviewed pull requests, mentored team members, and made key technology and implementation decisions to keep the codebase scalable and maintainable.
- Collaborated closely with product and design teams to translate requirements into robust, production-ready interfaces.
- Optimized application performance, accessibility, and responsiveness across the platform.

**Frontend Developer** — **Gruve** *(November 2024 – November 2025)*

- Became more hands-on within the engineering team as a mid-level developer, taking ownership of major features and technical improvements.
- Architected and developed comprehensive features for the Gruve admin dashboard, enabling streamlined management and internal operations.
- Played a central role in the upgrade of the web application, modernizing the codebase and improving overall performance and maintainability.

- Built and maintained reusable, responsive UI components to accelerate development across the product.
- Worked closely with backend engineers and designers to ship polished, production-ready features on schedule.
- Debugged and resolved complex frontend issues to improve application stability and user experience.

**Intern / Junior Frontend Developer** — **Sippy** *(October 2023 – October 2024)*

- Implemented designs within a full-stack Next.js e-commerce solution, transforming client ideas into responsive, high-performance user interfaces.
- Built critical features including user authentication, secure payment integration, and an intuitive admin dashboard.
- Collaborated with senior developers to learn best practices in component architecture, state management, and code review.
- Contributed to improving the overall e-commerce experience through iterative UI/UX enhancements.
- Assisted in maintaining and debugging existing features to ensure platform reliability.

## EDUCATION

**B.Eng, Petroleum Engineering***January 2014 – December 2019*
University of Benin, Benin City, Edo

## SKILLS

HTML • CSS • Sass • JavaScript • TypeScript • React • Next.js • Redux • Tailwind CSS • Chakra UI • Vercel • Netlify • Claude • Netlify • CoPilot • ChatGPT • Cursor • Gemini • Antigravity • Shadcn UI • Git • REST APIs • Responsive & Pixel-Perfect UI Development

## HOBBIES & INTERESTS

**Anime** (Naruto, Attack on Titan, Bleach, Solo Leveling) • **Football** • **Basketball** • **Movies**
**Reading Ancient Mythologies** • **Astronomy**
